Steps for Delete API Call

Step 01: Create a method in api-faculty.service.ts

```
delete(id:number){
    return this._http.delete(this.apiUrl + "/" + id);
}
```

Step 02: Add button and bind it on click event to a method in detail-faculty.component.html

```
<input
    type="button"
    value="Delete"
    class="btn btn-danger"
    (click)="deleteFaculty()" />
```

Step 03: Inject Router in detail-faculty.component.ts

```
constructor(
    private _activatedRoute : ActivatedRoute,
    private _api : ApiFacultyService,
    private _route : Router) {  }
```

Step 04: create a method named deleteFaculty() in detail-faculty.component.ts

```
deleteFaculty(){
    let ob = this._api.delete(this.id);
    ob.subscribe((res:any)=>{
      this._route.navigate(['faculties']);
    });
}
```
